

PAGERO

Compliance

Fulfil local e-document and
tax requirements

How we ensure compliance

Our multi-channel compliance solutions make it easy for your organisation to become and remain compliant with business tax legislation.

Pagero stays on top of changing regulations to ensure your business is always up to speed and compliant with local laws, no matter your industry or market.

Regulatory Affairs department

Our in-house team monitors regulatory frameworks for you

Special interest groups

Internal SIGs spread best practices throughout our organisation

Automated services

Our platform is updated regularly with zero downtime for users

Compliance partners

Our know-how is built on collaboration with trusted industry experts

Our compliance areas

To help our customers meet all local requirements, our compliance solutions cover a number of areas:

E-documents

Meet requirements on issuance, distribution, receipt and validation of e-invoices, e-orders and more.

Indirect tax

Ensure compliance with VAT/ GST requirements for local and cross-border invoice content.

E-archiving

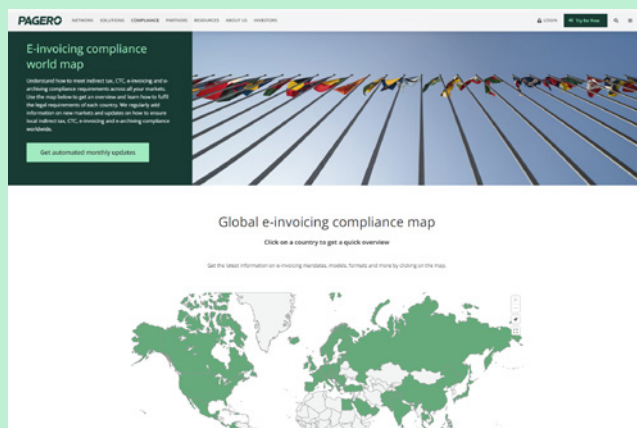

Meet e-archiving requirements, such as audit and legibility, for local and cross-border invoicing.

E-reporting

Meet SAF-T, MTD, SII and other reporting requirements, in partnership with Thomson Reuters.

Make sense of regulatory e-invoicing requirements

E-invoicing compliance map

Use our interactive **Compliance World Map** to get an overview of e-invoice and e-document requirements in the countries where you operate.

Click on a country to get a quick overview at pagero.com/compliance/world-map

Network reach

With a single connection to the Pagero Network, you can reach all your trading partners, no matter what systems, networks or government platforms they use.

Peppol

Pagero is a Certified Peppol Service Provider, member of OpenPeppol, and trusted government advisor, supporting the development and implementation of Peppol globally since 2012.

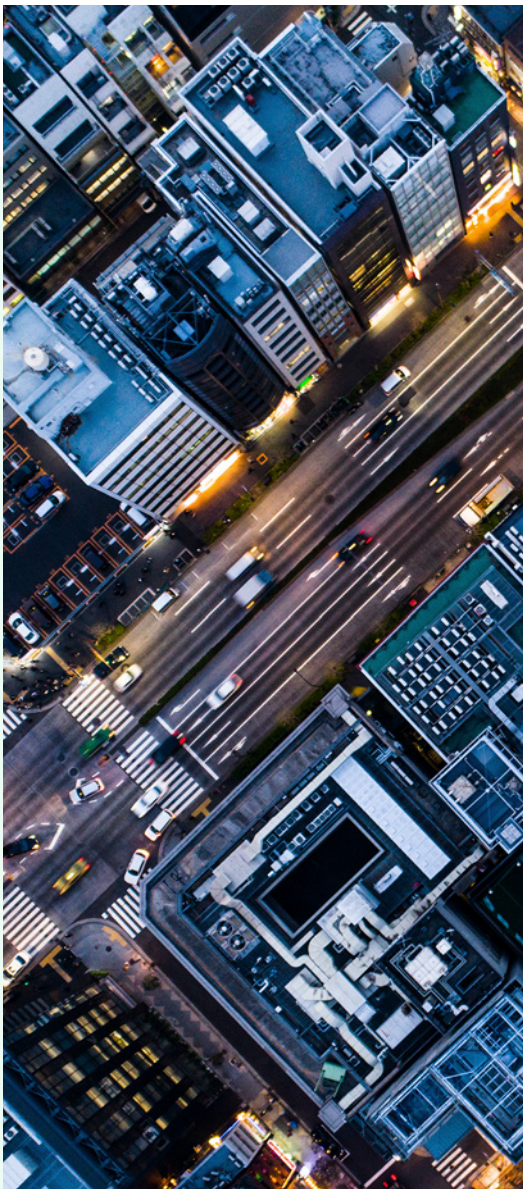

Government platforms

Pagero is integrated with various government platforms and infrastructures worldwide to provide compliant document exchange, regardless of the country's e-invoicing model.

Interoperability

Our open, cloud-based network utilises best practice principles of the four-corner interoperability model to give you global connectivity for e-document exchange.

Data Privacy

Data privacy officer

Our dedicated data privacy officer ensures that our internal practices and processes protect customer data privacy rights.

Privacy Notice

Our Data Privacy Notice protects the integrity of individuals in accordance with data protection laws.

Best practice

We continuously monitor and update organisational processes to meet GDPR and other data privacy laws.

Third country transfers

Get an overview on Schrems II and third country transfers when utilising the services provided by Pagero.

Industry associations

Through active involvement in industry-specific organisations, we advise government agencies, share learnings, support global development and promote industry best practices.

We have been able to fulfil our invoicing-related tax and legal requirements in all 29 countries where we use Pagero as our e-invoicing service provider.
